

## CODE GOLF

In the game of golf, the player who completes the course with the fewest club strokes wins. Likewise, code golf is a competition to achieve the specifications in the fewest possible characters of source code. This competition focuses on short and succinct code. The challenge is to produce answers to the provided problems with as little code as possible. Your score for each problem will be the file size of your source code for that problem

### General Rules:

1. This is an individual event.
2. The duration for the event is 90 mins.
3. Participants are expected to bring a pen with them. Sheets will be provided.
4. Once the event starts, no one else will be allowed to participate.
5. No electronic gadgets of any type allowed in the venue.
6. The list of programming languages that can be used will be disclosed on the day of the competition itself.
7. The actual code you submit cannot be generated text.
8. Your code cannot call any external processes.
9. Your code must be able to be run independently of any other personal files (i.e. you can use standard libraries and other modules but you can't write code in another file and simply call it in your submission file).
10. **You cannot compress your files.** You must submit your raw source code.
11. Special instructions, specific to the questions given will be given in the day of the competition.
12. In any case of discrepancy, the decision of the organizers will be final and binding.

### Judging Criteria:

In general weight-age will be given to the size of the code, time taken to submit the code and correctness of logic. Special points will be awarded for writing obfuscated code. Distribution of marks will be explained in detail on the day of the event.
